-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION****Drawings**

The drawings are objected to under 37 CFR 1.84(h)(5) because Figures 1-5 show(s) modified forms of construction in the same view. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended (replacement) drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### **Claim Rejections - 35 USC § 103**

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over USPN 6,182,334 to Davancens. Davancens discloses an end fastener (12) for use with a pair of eyeglasses (14) having manually operated, elongated temple legs (16), the end fastener comprising;

a sleeve (34) of pliable material having an open end, a closed end (32), an internal length and a cylindrical internal cross-sectional dimension; and wherein the internal length appears to be in the order of 2.5 cm or less and the internal cross-sectional dimension appears to be in the order of 1 cm or less (Figs. 2 & 3), however, Davancens does not specifically disclose the specific measurements as claimed. It would have been obvious to one having ordinary skill in the art to envisage the end fastener(s) of Davancens being modified to have a range of sizes, shapes and dimensions in accordance to fasten to eyeglasses of different styles, shapes and sizes, moreover, it has been held that discovering an optimum value of a result effective variable involves only routine skill in the art.

Regarding claim 2, although Davancens discloses that the internal cross-section is circular, it would be obvious to one of ordinary skill in the art that this shape can be rectangular as well to be received onto temple legs that are substantially rectangular in shape, thus providing an end fastener adaptable to fit onto various shapes of temple legs with a secure grip.

Art Unit: 3677

As to claims 4-6, 9 and 12, Davancens discloses that the end fastener is composed of a outer body or overlay (30) with an internal core or liner (38). The pliable material of the end fastener is an elastomeric material having a hardness value within the claimed range (col .5, lines 25-27).

### Conclusion

The following are suggested formats for either a Certificate of Mailing or Certificate of Transmission under 37 CFR 1.8(a). The certification may be included with all correspondence concerning this application or proceeding to establish a date of mailing or transmission under 37 CFR 1.8(a). Proper use of this procedure will result in such communication being considered as timely if the established date is within the required period for reply. The Certificate should be signed by the individual actually depositing or transmitting the correspondence or by an individual who, upon information and belief, expects the correspondence to be mailed or transmitted in the normal course of business by another no later than the date indicated.
